

Kickoff for Bioinspired Robotics

The Bio-inspired Robotics session will deliver an overview of this rapidly evolving field with an emphasis on recent developments. Its goal is to provide alternative solutions to existing real-world problems by looking at engineering and robotics from the perspective of biology and nature. With a panel of well renowned experts in the field, the session will cultivate points of inspirations and solutions for individuals of different backgrounds and discipline in both science and engineering. Get ready to be inspired, bioinspired!
